

## COVID-19 A “NOVEL” APPROACH TO PANDEMIC

Compare these long-established and logical pandemic procedures with how the officials we trust have dealt with COVID-19. How do you account for the difference?

PANDEMIC MEASURES	vs	COVID-19 MEASURES
Authorities and doctors inform people as information comes in, taking care to avoid starting a panic.		Politicians present information in ways that highlight the threat, and create a climate of fear.
People judged to be most at risk are identified and pre-cautions are taken to isolate and protect them.		The <i>entire</i> population is subjected to extreme measures including 70-80% who are at low risk. <sup>1</sup>
More and more seriously ill people are found and affect more and more neighbourhoods.		For many, cases of illness are generally only heard about in the media or at second or third hand. <sup>2</sup>
Throughout the entire country emergency rooms and hospital wards are overcrowded. Staff is on overtime.		At height of COVID surge, there are reports of underutilized hospitals, and many empty beds. <sup>3</sup>
Established pandemic protocols are rigorously followed. Accurate statistics, and terminology is critical.		Established protocols are often not followed. Counts are unreliable. The term “case” is misused.
Strict tallies are kept of cases and deaths so epidemiologists can evaluate the risks of the disease.		The media conflates cases with deaths. Doctors told to list deaths by other causes as COVID deaths. <sup>4</sup>
Statistics show “excess” deaths significantly above the normal mortality rates for the period.		Number of deaths overall are not much different from normal year-over-year mortality rates.
The suspected pathogen is isolated and studied to prove it is the cause of the symptoms of the illness.		No lab or govt anywhere has shown it has isolated a virus proven to cause COVID-19 symptoms. <sup>5</sup>
If tests used on people confirm their symptoms are caused by the pathogen, then they’re called a “case”.		PCR tests misused at high cycles on asymptomatic people generate <i>over 90%</i> false positive “cases” <sup>6</sup>
Broad communications are essential with doctors, specialists and nurses to create treatment protocols.		Renowned scientists are discredited and concerns of front-line doctors are rejected. <sup>7</sup>
As soon as treatments are shown to be effective, it is immediately communicated throughout the system.		Successful treatments are ignored and doctors are banned from sharing treatment discoveries. <sup>8</sup>
Throughout the pandemic the priority is on health not profits, and getting people safely back to normal life.		Makers of vaccines dominate media for months saying the <i>only</i> way back to normal life is a vaccine.
Clear consistent guidelines are established as soon as possible in order to find a cure quickly and efficiently.		Guidelines are inconsistent, illogical and contrary to science, and we’re never any closer to the end.
Politicians and health authorities try to minimize negative impact on people, businesses and economy.		Right from the start businesses are told to stop operating. The economy is <i>deliberately</i> collapsed.
People follow health guidelines confident govt and health authorities have their best interests at heart.		People follow guidelines, under fear of social pressure, being reported to police, and heavy fines.
People struggle with a health crisis knowing they are being helped by government.		People are struggling with the social, psychological and economic upheaval <i>caused by government</i> . <sup>9</sup>
